FLUFFY LOU NEEDS YOU!

It's \$5 Friday and Fluffy Lou needs your help. Seven-year-old Fluffy Lou is a beautiful, gray, long-haired cat who came into PAWS care when her owner passed away. She is a friendly, affectionate girl who loves people, but hates other cats. Her foster mom describes her as quite a diva “who *definitely* marches to the beat of her own drum.”

Fluffy loves human attention and will sit on her person's lap, kissing and demanding to be pet.

If you stop, she will grab your forearm and bring it towards her.

She loves to have her soft, long hair combed. She is treated royally in her foster home, getting the same food as her foster mom's own cats. She is even particular about the dish the food is in: she prefers shallow bowls. As always, her wishes are granted!

Because she tends to be aggressive towards other cats, Fluffy gets to have to her own space in her foster home. There she can look out the windows and listen to classical music on the radio.

As with all our PAWS cats, Fluffy Lou had a vet check-up when she arrived in April. At that time, it was determined that she has dental disease and therefore, needs to return to the vet for a comprehensive exam of her entire mouth, back of the throat, and teeth,

including X-rays, scaling all the teeth, and, probably, extracting one or more teeth. Yikes! Dentals are expensive, costing \$1000 or more. She has an appointment scheduled for later this month, so wish her luck!

Once Fluffy Lou recovers from her dental, she will become available for adoption and ready to find her new family.

Today is \$5 Friday!

If you are able, your donation today will go a long way to help PAWS pay for this expensive treatment and allow Fluffy Lou, and other kitties like her, to live without the pain and discomfort caused by dental disease.

Please [CLICK HERE](#) to donate via credit card, Venmo, PayPal.

OR, if you prefer, mail a check, payable to PAWS, to:

PAWS \$5 Friday
